I have no idea why the reviews are so high for this. Are people going really easy on it because of the price? For me, this is a very cheap game and plays like it. It doesn't even have a tutorial or any kind of introduction to the story. The combat, overworld and controls all feel clumsy. There's nothing that appeals to me about this game at all. I mean I know it doesn't cost much, but there's still an investment of time as a player here. I can't justify using my time on this as opposed to a more in-depth, smooth, and professionally made RPG. Skip this title and save your money until you can afford something better.. I have no idea why the reviews are so high for this. Are people going really easy on it because of the price? Don't let the positive reviews fool you and save yourself 0.99 or 1.99 whatever you're gonna buy it for. You're going to get exactly what you paid for. The combat is shallow, the story isn't anything too exciting, the level design is questionable, and the aspect ratio hurts my eyes. Starting with the combat, you take turns attacking each other with an occasional block or heal with little to no strategy. By the time you have your full selection of weapons and abilities, there's very few enemies that they'll actually be necessary for. I think the final enemies/bosses are the most fun since they actually require some prep time and planning. But overall that fun is short lived. The story isn't exactly something that pulled me in, I won't get into spoilers but most of the "story" will be in the final hour of your playthrough. As for the level design, it wasn't anything too bad until the final area where there's no sense of direction and it feels like you're walking in circles. At one point you have to walk into a wall and "out of bounds" in order to progress. Which is something I would have never figured out unless I checked a guide. There are also some items that require you to walk into walls and again go "out of bounds" to obtain, but overall I made it through fine without ever giving them a second thought. And now for the worst offender, the aspect ratio. You're left with no choice but to stare at a small little box for hours with a possible migraine. If you try to play full screen, the resolution is stretched and doesn't look very good. I think there is a fix for this someplace, somewhere, but it wasn't apparent when I played so I got stuck with the small box. I guess I should mention the controls, you move with the arrow keys, interact with enter, and sprint with shift. Keyboard controls are pretty awkward so I opted to use a gamepad. Which \*surprise\* force you to move around with the analog stick rather than the dpad. I guess it isn't that big of a deal, I just think its unfortunate that there's no choice to move around with the dpad since the keyboard controls clearly aren't viable. Point I'm trying to make, is even if its price is something you can live without, the time you'll lose is something you'll never regain.. A short but fun jrpg :). A short but fun jrpg :)
